

Sales & Revenue Analysis

BUSINESS REQUIREMENT DOCUMENT (BRD)

1. Document Purpose

The purpose of this document is to define the business requirements for analyzing company sales data in order to understand revenue performance, identify trends, and support data-driven business decisions.

2. Business Problem

The organization generates large volumes of sales data, but lacks a structured approach to analyze and interpret this data. As a result:

- Revenue trends are not clearly visible
- High-performing and underperforming products are difficult to identify
- Regional and channel-wise performance is unclear
- Management decisions rely on intuition rather than data

The core business problem is **limited visibility into sales and revenue performance despite availability of data**.

3. Business Objectives

The objectives of this initiative are to:

- Analyze overall and monthly revenue trends
 - Identify top-performing products and regions
 - Compare sales performance across sales channels
 - Measure key sales performance indicators
 - Provide actionable insights to improve revenue growth
