

HRMS Attendance & Payroll Automation

Functional Requirement Document

1. Purpose of the Document

This document defines the **functional behavior of the system** required to fulfill the business objectives outlined in the BRD.

2. Stakeholders

Stakeholder	Role
HR Manager	Reviews and approves requirements
Payroll Executive	Uses payroll functionality
Employees	Uses attendance and leave features
IT / Development Team	Implements the system

3. Scope

The FRD covers system functionality related to:

- Attendance tracking
 - Leave management
 - Payroll calculation
 - Reporting
-

4. Assumptions & Dependencies

- Employees will record attendance daily
 - Leave approvals will be completed before payroll processing
 - Payroll will be processed once per month
 - Attendance and payroll data will be available in a centralized system
-

5. Functional Requirements

Attendance Management

- The system should capture daily employee attendance
- The system should store login and logout time
- The system should mark attendance as Present, Absent, or Leave

Leave Management

- The system should allow employees to apply for leave
- The system should allow HR to approve or reject leave requests

Payroll Processing

- The system should calculate payroll based on attendance data

- The system should apply salary deductions for unapproved leave
- The system should generate monthly payroll records

Reporting

- The system should generate attendance summary reports
 - The system should generate payroll reports for HR and management
-

6. Business Rules

- Unapproved leave results in salary deduction
 - Payroll is processed once per month
 - Overtime requires HR approval
-

7. Validations & Error Handling

- The system should prevent payroll processing if attendance data is missing
 - The system should display error messages for incomplete inputs
-

8. Non-Functional Requirements

- **Performance:** Reports should load quickly
 - **Security:** Role-based access should be implemented
 - **Availability:** The system should be available during working hours
-

9. Acceptance Criteria

- Attendance data is accurately captured and stored
 - Payroll calculations match attendance and leave data
 - Reports display correct totals and summaries
-

10. Approval & Sign-off

This document will be reviewed and approved by:

- HR Manager
- Payroll Team
- IT Team
